

Chapter 15: Pseudocoelomate Animals

Pages 304-314

| 1. | List eight characteristics that distinguish pseudocoelomates from other animals. |
|----|--|
| | |
| 2. | What are some adaptive advantages of a pseudocoel compared to the acoelomate condition? |
| | |
| 3. | Explain the difference between a pseudocoel and a true coelom. |
| | |
| 4. | Describe the interaction of the cuticle, body-wall muscles, and psuedocoelomic fluid in the locomotion of nematodes. |
| | |

| 5. | What is a hydrostatic skeleton? |
|----|---|
| | |
| | |
| | |
| 6. | Outline the lifecycle of each of the following: <u>Ascaris lumbricoides</u> , <u>Hookworm</u> , <u>Enterobius</u> <u>vermicularis</u> , <u>Trichinella spiralsi</u> , <u>Wuchereria bancrofti</u> . |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| | |
| 7. | Where in the human body are the adults of each species in question 6 found? |
| | |
| | |
| | |
